## FACTS ABOUT VEIN IN WABASH MINE

President Treweek Gives First Detailed Statement of the Latest Development.

MINE IS ON THE VERGE OF SUCCESS

Splendid Showing Promises to Make Early Into Great Mining Property.

to the stockholders and the public some facts regarding the new find of ore in this property. President N. Treweek stated yesterday that the management had said nothing for two months, but had been bending every energy on opening up the ores in this time. The colonel snid:

The 600-foot crossent vein has been drifted on up to date for 250 feet, the work being done on the new vein at a vertical depth of 1400 feet from the surface. We have had more or less ore the entire length of this drift, the drift being driven along the hanging wall of the vein. The best ore always has been shown in the roof of the drift, indicating that we are running under indicating that we are running under an ore body. We have crosscut the vein and find that its horizontal width is \$6 feet, the true thickness of the vein at right angles to the dip being about

"This crosseut now is in a distance of 133 feet, and it will be continued for a considerable distance yet as we believe that there is a parallel vein ahead which this crosseut will intersect. Thursday morning all work was stopped in the faces of the drifts, and the manin the faces of the drifts, and the man-genent is now enlarging the station at the shaft to take proper care of the accessed quaterials which must be handled. We also are repairing and planking one part of the main cross-cut and culting out at station on the inside of the works so us to put horses in to move these materials. This work will take two weeks, so we will be able to get back into the faces by the ex-piration of that time.

of that time.
"Of account of the water it has been impossible to raise on this yein. But it is draining very rapidly, so we shall majortalic to upraise on the most pro-inective portion of the vein as shown at the present time when these im-provements are all completed. So the work an onlined by the company is work an outlined by the company is work an outlined by the company is number of the constant and upraising on the vein. This work will require sort Chief a force of thirty men, the number we seem Tr. Stork Constant of the company is the company in the company is the company in the company is the company in the company is now that the company is the company in the company is the company in the company is the company in the company is now that the company is now the company is now the company is now that the company is now the company is now that the com

naw have in the paine.

We have taken not considerable good ore in presenting our development work, and I will say that if conthent work, and I will say that if conditions continue as they now look all are troubles will be ever. The voin's Sacrament are troubles will be ever. The voin's Sacrament as strong one and well defined. In my manion it will make a mine. The values of the armount of the condition of the conditi acted to those already and we will have thirty, thus allowing trains of ten

ars each to remove material

The above statement from President Review is conservative in view of the generally appreciated developments, though heretofote in a vague way, by the public in general. It looks now as if the company at last had opened a new bunance up at Park, after seven long at the company version of markets. and troublesome years of endeavor and actry \$750,000 expenditure. At the present time, states Colonel Treeweek, large are one bundred stockholders on the books, and they have stayed by the atomany, paying their assessments pa-ionaly in the hope that some such derelopment would transpire as now is in hand. It will be conseded that they deserve success, and success at the Wabash means as much for Park City as it does for the stockholders who bravely baye borne the burdens of the past

#### MORE TROUBLES OF SHIPPERS OF ORES

Harry S. Joseph, who is on the trail of the American Smelting and Redning company, presented some settlement sheets. Thursday and some figures that he wanted to be explained. He states that not long ago a shipper sent in one valued at 136.28 per ton, and of this amount the American company got \$19.66. He states hat after the smelling company would deduct all reasonable smelting charges, freight on builton to the East, all charges for the deleterious materials contained within the ore, there is still the sum of 35.20 left which he can find no occasion for keeping from the shipper. There was smother lot of ore, he states, the gross assay value of which was \$38.65 per ton, if which the smelting company got \$14.29.

#### Besten Copper Gossip.

Boston Copper Gossip.

James A. Pollock & Co., bankers and be be be tyest Second South atreet, furnish the following, received over their prinish the following, received over their prinish to be the control of the following and attention.

San Francisco Wires—This market is waking up and will do better. Believe there is a material advance ahead in mining shares and that business and interest them will increase as prices go higher to opposing factor has been duliness, a cult of universal activity among the cokers in the new Rawhilde properties, which appears to have reached its climax for the largest copper-producing interests in the largest copper-producing interests in this country tells the Boston Financial News this morning that consumers are settambling for lake copper at 12½ cents and that the market is liable to advance any day.

Ticket says—All the large copper-pro-

any day.

Ticker says—All the large copper-producing and selling interests, it is stated, are now soid out up to date and have no more spot copper on hand. Phelps-Dodge & Company were soid up some days ago. The Stanton interests are now refusing to sell any more copper at 131 cents. The Lewishons closed out their last half-million pounds yesterday for export at 131 cents and it is understood that the United metals Selling company also cleaned up overy pound of spot copper it had on hand teveral days ago.

Ore and Bullion. The ore and builton receipts for Thursday, given by McCornick & Co., were as follows: Ore, \$15,000; builton, \$25,000.

if there was any foundation for the reports.

Mr. Knight stated to The Tribune in addition to what is given above, that not only had no efforts been made by either himself or the American Smelting and Befining company to bring about such a deal, but that as far as he himself was concerned, no such thought had ever occurred to him. Mr. Whitley, general manager of the American company, also denied during the day most positively that such an option had been secured.

NO SUCH ACTION

had been secured.

All Salt Lakers interested in mining gave a sigh of relief when the rumor was found to be absolutely without foundation in fact. Everyone is in hopes that the Knight smelter will maintain its separate and independent identity for the good of the mining and smelting industries of Utah. It was recognized yesterday as a calamity should it be found true, that he had surrendered his plans to the American company.

Knight never for a moment dur ing the past year has turned one whit from the programme of building and equipping his new smelter to the fullest extent of financial possibilities, nor from the one set plan of placing the plant into active commission as fast as the task could be completed. There have been doubts expressed in local circles as to the new smelter being placed into commission, but they are rechained without Mr. Knight. His friends aint out that he was considered wild and illogical at the time he started to build his sugar factory in Canada. He not only built it, fighting the sugar trust into silence, but he is now conducting this factory successfully. They say that te same reports are now being tered around about the smelter than Beck Tunnel, 100 at 93c. Bullock, 600 at 7c; 1000 at 7c. buyer were in evidence during the preparatory stage of the sugar factory, and they expect Mr. Knight to meet with ty days. 250 at \$5,575; 200 at \$3,774; ler sixty days. ## AMERICAN FORK ORE RUNS TO MONEY FAST

Wild Brothers Market Some Jesse Knight Issues Denial in Good Rock From Lease in District.

A district of Utab that contains some of the most attractive mining propositions in the State, but one which seldom gives any intimation to the world of its successes and efforts, is the American Fork section of Utah. American Fork is no stranger to the ore markets even if it is a stranger to the publicity columns, and the district is again called into notice by the reported shipment from the lease on the upper works of the Dutchman property of three ears of ore, for which the leasers secured the amount of \$4440 "There is not a word of truth in the the ore running between \$40 and \$50 per ton. The lease is owned and operated by the Wild Bros. of American report that I have given an option on my new smelter, or on any other propo-

Fork.
The mines of American Fork canyon produce ores containing mainly rich silver values, and from the work already accomplished it has been reasonably demonstrated that the resources extend to good depths. Utah has a somewhat vague idea of the richness of this American Fork district, and it would learn more were the operators up there as willing to give the results of their endeavors for publication as option not only on his new Tintic smel-ter, but on all his mining possessions as the merits of the camp justify.

### SUNSHINE MINE NOW OWNED BY COMPANY

Boston and Local Interests Form Company to Work Noted Property. . .

Articles of incorporation were prepared Thursday afternoon for the company to be known as the Boston-Sunshine Gold Mining company, the articles being forwarded to Mercur for a signature before filing. This is the organization that will take over and round out into the successful column the noted old Sunshine property of the Mercur district of Utah. The property has been secured through a receiver's sale, and as the equity of redemption has expired the titles have

been cleared up and everything placed in order in a legal way. Arthur W. Chesterton of Boston, one of the directors of the Consolidated of the directors of the Consolidated Mercur company, is president of the new organization; John Dern, president of the Consolidated Mercur, is vice-president, and George H. Dern, manager of the Consolidated Mercur, is secretary and treasurer. The other directors are J. C. Dick, general superintendent of the Yampa, and John Martin, the engineer of Mercur. The company is capitalized for 250,000 shares of stock, par value \$1 each, 100,000 shares of stock being retained in the treasury. The company is formed under the laws of Utah. George H. Dern stated yesterday

in the treasury. The company is formed under the laws of Utah.

George H. Dern stated yesterday that the company also owns the Sunshine mill, which at the present time is in condition for work, although a slumes plant will be installed before operations begin. The ore of the Sunshine being identical with the Consolidated Mercur rock, on which such splendid saving is being made by the new slimes plant, the metallurgical problems of the new company are already successfully solved. There is a great deal of ore now in sight in the Sunshine property, the mine having been thoroughly developed by the former owners. The task of placing the company on a producing basis, therefore, is merely a question now of installing the slimes plant. This work will be done as soon as possible.

Mining Notes.

Capt. Duncan MacVichte left yesterday for Boston on business connected with the Heinza mining interests.

L. E. Camomile, mining editor of the Herald is confined at his home by a bad case of the grippe.

The Totro Mining company has levied an assessment of 1 cents per share on its outstanding stock.

New York Letter.

James A. Pollock & Co., bankers and brokers, 6 West Second South street, furnish the following, received over their private with passenday afternoon:

Walker Bres. Stock Letter—Market to-day opened steady and then continued on its upward course. Traders were quite active on the bull side and some of the Union Pacific announcement of bond issue there was an entire change and prices sold off rapidly. Many stop orders were caught and the market became very weak, but before the close it railied. We look for a professional market for the rest of the week.

### Costs You Less Than One Cent a Day

We have the best protected—the strongest and safest -- Safety Deposit Boxes in the West.

They are so inexpensive that no man with Insurance Policies, Deeds, Bonds, Mortgages, Stocks or other valuable papers can well afford to do without one of these Safety Deposit Boxes.

They rent for \$3.50 a year and upward-according to

So, for less than one cent a day individuals can protect their valuable papers against all risks of loss, theft or fire. The cost to firms, corporations, societies, etc., is com-

Utah Savings & Trust Company

#### STAMPEDE TO NEW CAMP NEAR AUSTIN

paratively inexpensive.

Charles @ Higgins has written leval associates of a new district just born near Austin. Nev. Mr. Higgins states that the new center of interest is seven miles from Austin, and one and one-nalf miles from Watt. There is much excitement, he says, among Tonopah people, and a great rush of stampeders is taking place. Several properties are being operated by leasers, and he has secured an option on the property adjoining the main group in the camp. He found high grade within twenty-fours in a surface cut. The ore carries bromides, chlorides and horn silver, and is described as being both very rich and strong.

San Francisco Mining Stocks. SAN FRANCISCO, March 26.—The offi-cial closing quotations for mining stocks today were as follows:
